CHERRY BOMB

Designed by Lindsey Adelman exclusively for Nilufar.

A network of slender brass angular tubing that creeps up the wall and along the ceiling, punctuated with hand-blown mini-globes like a reductive cherry blossom branch. The concept is practical in that each piece can be installed as a sconce or ceiling light, or combined to create an immersive room installation. Cherry Bomb is designed to reside in the often neglected surfaces and corners of an interior yet have an effect on everything in it. Lindsey Adelman and her team design and build each fixture to order.
